| **GRAND TOTAL (2000-2007)** | **23,102,585** | | | | | | | | |

Calculations lifted from TFS and Breeder databases, where gaps occurred averages were taken for years in which there was adequate data from a particular grower and this information was applied to the gap years, if no data was present Tim Alsup and Brian Delozier estimated the number of heads based on experience

All numbers represent "Number of head capitalized" per year

NOTE: need to look at color coded spreadheet provided by Cargill to show where estimated numbers are used

| Cobb | TOTAL NUMBER OF BIRDS |
|---|---|
| 2000 | 1,287,974.00 |
| 2001 | 1,189,358.00 |
| 2002 | 1,279,798.00 |
| 2003 | 1,237,193.00 |
| 2004 | 1,250,237.00 |
| 2005 | 1,243,562.00 |
| 2006 | 1,244,481.00 |
| 2007 | 1,285,580.00 |
| TOTAL | 10,018,183.00 |

Calculations for total number of birds was pulled from Cobb's grower database which did not account for double counting. To remedy double counting Cobb could review each flock profile report; however, due to the time it would take to review the profiles Cobb estimated the total number of birds in the IRW by reducing the total number of hens placed into poultry growing growing operations in the IRW by the percentage of Cobb pullet farms located in the IRW.

| | 120,566,550.00 |

No explanation of how numbers were reached other than "best estimation" No totals were given only numbers of birds per grower per year

**includes only the months of July, August and September

* using "picked up" numbers

to explain the "in" and "out" designations on the tables in the Second Supplemental Response. In the **pullet table**, the "in" number is an additional number of birds which were placed in the house for whatever reason after the initial placement; thus, the "placed" number plus the "in" number is the total placement in the house for the fiscal year with the difference between the sum of those two numbers and the "out" number representing mortality. In the **hen table,** the "in" number is the placement number. The "out" number is the number of birds removed from the house, but not sold: there can be any number of reasons the birds are moved out of the house, such as the transfer to another farm, facility, etc. As I understand, if the difference between the "in" number and the sum of the "out" number and the "sold" represents mortality.

Tyson Foods' is a wholly-owned subsidiary of Tyson Breeders, Inc. Response states that these calculation "provide[] information relating to poultry growing operations under contract with Tyson Foods'." Later refers to growers under contract with Tyson Breeders

Calculations retrieved from "Grower Information System". To account for chick suppliers over supply these numbers were increased by 2%. To account for mortality the seven-year average mortality was used. The resulting number is the number of birds moved from the pullet operation to a hen operation at 20 weeks. The number was then averaged to determine the number of birds. These numbers were then aggregated on an annual basis.

**COBB-VANTRESS, INC.'S SECOND AMENDED RESPONSE TO PLAINTIFFS' FIRST SET OF INTERROGATORIES**

Pursuant to the Court's Order dated December 7, 2007 (Dkt. No. 1409), Defendant COBB-VANTRESS, INC. (hereinafter referred to as "Defendant" or "Cobb"), submits its Second Amended Response to subsection (d) of Plaintiffs' Interrogatory No. 1. This Second Amended Response supplements all prior responses to subsection (d) of Plaintiffs' Interrogatory No. 1.

**INTERROGATORIES**

**INTERROGATORY NO. 1**: For each of your poultry growing operations in the IRW since 1952, please provide the following information:

a. name and physical location of the operation;

b. dates of operation;

c. type of operation (breeder, broiler, layer, etc.);

d. number of birds (aggregated annually) at each location; and,

e. name of the owner and operator.

**RESPONSE TO INTERROGATORY NO. 1(d):** Cobb objects to Interrogatory No. 1

as it is overly broad in scope and time and, therefore, overly burdensome. Cobb objects to the Plaintiffs' definition of "Defendant" as it is overly broad and includes within its scope "Contract Growers." Cobb submits this answer and response for itself and not for any other person or entity. Subject to and without waiving these objections, Cobb responds to Interrogatory No. 1(d) as follows.

Cobb does not possess information sufficient to answer Interrogatory No. 1(d). Cobb has not historically identified contract poultry growing operations by the watershed and does not in the regular course of business track or report bird production by watershed nor does Cobb calculate or record bird production on an aggregated annual bases as part of its regular business practices. Accordingly, Cobb does not know the total number of birds raised on farms under contract with it in the IRW on an annual basis.

In order to comply with this Court's Order dated December 7, 2007 (Dkt. No. 1409), Cobb has estimated the total number of birds raised each year from 2000 through 2007 on poultry growing operations under contract with Cobb in the IRW. The following steps, assumptions and calculations were required to arrive at this estimate. First, Cobb identified all poultry growing operations between January 2000 and December 2007 believed to be or to have been located in the IRW. Second, Cobb retrieved from its [name of grower database] the total reported number of birds placed at each identified poultry growing operation each year from 2000 through 2007. Third, because birds are moved from pullet farms under contract with Cobb to hen farms under contract with Cobb, it is necessary to adjust the number of hens placed on Cobb poultry growing operations to eliminate the possibility of counting the same bird twice. It would be overly burdensome to actually track the movement of all Cobb pullets in the IRW over the past seven years from pullet operations to hen operations. To do so would require manual

review of each flock profile report generated with respect to poultry growing operations located in the IRW during the relevant time period. Flock profile reports are generated on a weekly basis, and the number of reports to be reviewed would be extremely large. Therefore, a reasonable estimated adjustment to the number of hens placed was made through the reduction of the total number of hens placed onto poultry growing operations in the IRW by the percentage of Cobb pullet farms located in the IRW as compared to the total number of Cobb pullet farms.

Subject to the foregoing qualifications and without waiving its objection, Cobb provides the following estimate of the aggregated total number of pullets and hens placed annually on poultry growing operations under contract with Cobb in the IRW.

| Year | Total Number of Birds | Year | Total Number of Birds |
|---|---|---|---|
| **2000** | 1,287,974 | **2004** | 1,250,237 |
| **2001** | 1,189,358 | **2005** | 1,243,562 |
| **2002** | 1,279,798 | **2006** | 1,244,481 |
| **2003** | 1,237,193 | **2007** | 1,285,580 |

The above figures are estimates only. The reliability and error rate in these estimates is unknown at this time. Cobb reserves the right to challenge these estimates as unreliable if presented in court and further reserves the right to revise or supplement these estimates if additional information is obtained or a more reliable estimation methodology is identified.

Respectfully Submitted,

**Cc:** 'Baker, Fred'; David Riggs; Louis Bullock; 'Kelly.Burch@oag.ok.gov'
**Subject:** RE: Bird totals

James,

It has now been more than two weeks from our last communication and the State has not received the supplemental interrogatory response from Georges as was promised. I would appreciate if you would please provide the same Monday or a date when it will be provided.

In that regard I would also remind you of the court's order to provide the method of calculation and the margin of error with George's supplemental response.

In addition I do not find in George's responses to States Interrogatory 1 (a-d), information regarding the dates of operation for each grower you have identified as requested in part b of the first interrogatory.

Please provide George's supplemental responses as soon as possible. Thanks,

Rick

**Subject:** RE: Bird totals

James,

Should not this information be placed in the form of a response to Interrogatory No. 1? Others in responding have done so as it is the information requested in the State's Interrogatory #1. While you provide an explanation in the email, as instructed by the court, the information should be in a form that reflects it is the statement of the

George's entities. Please let me know your thoughts on whether you will revise the response.

Rick

**Sent:** Monday, January 07, 2008 4:59 PM
**To:** Richard Garren
**Subject:** Bird totals

Rick,

Attached are the bird totals in electronic format in accordance with the Court's recent Order concerning same. This is also in follow-up to our meet and confer on this issue. To wit, we provided searchable tiff format productions of actual reports utilized by George's which contained source information for the attached documents, with all but IRW growers redacted. These reports were run off of our Laser Vault system from retained image files, and converted by a vendor into searchable tiff format.

We advised during our meet and confer that we would follow-up to determine if there was any way to electronically pull IRW-only growers from these reports that were in our Laser Vault print system and produce them in any type of electronic format. Since then, we had determined that the information was not available in an electronic "native format", but that it could be electronically searched, pulled from the Laser Vault print system image files already produced and dropped into an Excel spreadsheet. I believe Paul Thompson advised you of this capability, and we have now done it to create the attached information.

Just to be clear, the attached documents were created through a search process on a printer system at George's from reports previously printed to the system over the years. The data is as reliable as the search method and the original reports from which they were pulled, and the summary pages are as reliable as the formulas totaling the other tabbed pages. Moreover, the attached documents are not documents George's has ever possessed, used or kept in its business, but was created solely as a result of my meet and confer with you, a determination that a search could be run and data essentially reconverted to electronic format from printed reports in the printer system, and also based on the court's directive that the bird totals were to be produced.

If you have any questions, please advise.

**SECOND SUPPLEMENTAL RESPONSES OF DEFENDANT, PETERSON FARMS, INC. TO FIRST SET OF INTERROGATORIES AND FIRST REQUEST FOR PRODUCTION OF DOCUMENTS BY PLAINTIFFS**

Defendant, Peterson Farms, Inc. ("Peterson Farms"), respectfully submits the following Second Supplemental Responses to Plaintiffs' First Set of Interrogatories and Requests for Production of Documents, pursuant to Federal Rules of Civil Procedure 26, 33 and the Court's Order of December 7, 2007 (Dkt. #1409).

**GENERAL OBJECTIONS:**

1. Peterson Farms objects to, and does not agree to, or agree to subject itself to, the arbitrary and extraordinary "definitions" described by the plaintiffs to certain terms as set forth in their First Set of Interrogatories and Requests for Production of Documents propounded to Peterson Farms. To the extent that such terms appear in the plaintiffs' First Set of Interrogatories and Requests for Production of Documents and are in excess of the requirements of the Federal Rules of Civil Procedure, Peterson Farms instead ascribes to the ordinary, every day and reasonably, commonly understood meanings which apply to such terms, and also which comply with the Federal Rules of Civil Procedure. Peterson Farms objects to the definitions to the extent they assume facts not in evidence or related to facts or contentions in dispute in the action. Peterson Farms also specifically objects to the definition of "Defendant" as it is overly broad and includes within its scope "Contract Growers." Peterson submits these answers and responses for itself and not for any other person or entity, including any person or entity who raises poultry under contract with Peterson Farms.

2. Each of the following responses is made subject to and without waiving any objections Peterson Farms may have with respect to the subsequent use of these responses or the documents identified pursuant thereto, and Peterson Farms specifically reserves: (a)

all questions as to the privilege, relevancy, materiality, and admissibility of said responses or documents; (b) the right to object to the uses of said responses or the documents identified pursuant thereto in any lawsuit or proceeding on any or all of the foregoing grounds or on any other proper ground; (c) the right to object on any and all proper grounds, at any time, to other discovery procedures involving or related to said responses or documents; and (d) the right, at any time, upon proper showing, to revise, correct or clarify any of the following responses.

3. Peterson Farms objects to each and every interrogatory and request to the extent it seeks or calls for information or the identification of documents which are protected from discovery and privileged by reason of: (a) the attorney-client communication privilege; (b) the "work product" doctrine; (c) the "trial preparation" doctrine; (d) the joint defense or "co-party" privilege; or (e) any other applicable discovery rule or privilege.

4. Peterson Farms objects to each and every interrogatory and request to the extent it seeks information or the identification of documents concerning any claims or occurrences other than the claims and occurrences set forth in Plaintiffs' First Amended Complaint for which Plaintiffs request relief.

5. Peterson Farms objects to each interrogatory and request to the extent it seeks or relates to information or the identification of documents which are available to the public, and thus, equally available to Plaintiffs.

6. Peterson Farms objects to each request to the extent it seeks or relates to information or the identification of documents which are protected as proprietary and confidential trade secrets.

7. Peterson also incorporates as though fully restated herein all objections and limitations to responses made by every other defendant to the corresponding interrogatories and requests for production.

8. The foregoing objections apply to each and every response herein. By specifically incorporating individual General Objections in any response, Peterson Farms expressly does not waive the application of the remainder of the General Objections to such response. Subject to these objections and subject to any additional objections set forth hereinafter, Peterson Farms responds to Plaintiffs' First Interrogatories and Requests for Production as follows:

## SUPPLEMENTAL RESPONSES TO INTERROGATORIES

**INTERROGATORY NO. 1:** For each of your poultry growing operations in the IRW since 1952, please provide the following information:

a. name and physical location of the operation;

b. dates of operation;

c. type of operation (breeder, broiler, layer, etc.);

d. number of birds (aggregated annually) at each location; and,

e. name of the owner and operator.

**SUPPLEMENTAL RESPONSE:** Peterson Farms objects to Interrogatory No. 1 as it is overly broad in scope, and is therefore overly burdensome. Peterson does not possess information sufficient to answer this interrogatory as it seeks information regarding operations extending back in time for 54 years. Furthermore, Peterson Farms objects to the time period of this interrogatory as it seeks information that is neither relevant nor is it likely

to lead to the discovery of admissible evidence. In addition, Peterson Farms did not attempt to maintain grower information by watershed until 2003.

Subject to and without waiving the foregoing specific objections and its General Objections, Peterson Farms refers Plaintiffs to its contract growers' files (for current and former contract growers within the Illinois River Watershed), which it has previously produced for the time period of 2002 to the present. Peterson Farms also refers Plaintiffs to the tables attached hereto as Table "A" and Table "B",[1] which are incorporated herein by reference, containing the requested information for independent farmers under contract with Peterson Farms for poultry production who are believed to be within the Illinois River Watershed. The operations and other information in Table "A" and Table "B" have been identified to the best of Peterson Farms' current knowledge and ability and are subject to the qualification and caveats discussed hereinafter.

With regard to the capacity figures in Table "A", Peterson Farms periodically recalculates or adjusts poultry house capacity based on factors such as, but not limited to, the size of chicken in production, advances in poultry house technology, improvements in poultry house ventilation, increase in the number of poultry houses, retrofitting of existing facilities, and replacement of outdated poultry houses with modern facilities. The capacity figures in the "7/25/2007" column correspond with the capacity figures in the report marked Exhibit "1B" at the Rule 30(b)(6) deposition of Kirk Houtchens on July 26, 2007.

---

[1] Table "B" is comprised of three parts: B-1 for broilers, B-2 for hens, and B-3 for pullets.

With regard to the chicken production figures in Table "B", Peterson Farms maintains that, to the extent these figures are used to calculate or estimate the production and/or land application of poultry litter within the Illinois River Watershed, the information is inherently unreliable and, therefore, it objects to the admissibility of any such evidence for any claim before the Court. The chicken production figures in Table "B" represent Peterson Farms' best estimate as to the number of chickens placed in and removed from the respective operations during the identified fiscal years beginning October 1 and ending September 30, but Peterson Farms cannot certify the accuracy of the chicken production numbers for the Illinois River Watershed for reasons discussed herein.

As noted above, Peterson Farms did not begin categorizing, or attempting to categorize, growers by watershed until 2003, rendering chicken production figures for growers who ceased operations prior to 2003 less reliable than more current figures. The identification of any growers who terminated their relationship with Peterson Farms prior to the period in which it began attempting to designate the watershed of the growers as a part of its regular business practice were identified through a manual process based primarily on the recollections of long-term employees in Peterson Farms' live production department.

Similarly, many of the operations, whether current or former, are located on or near the boundary of the Illinois River Watershed and an adjacent watershed, leaving them subject to removal from (or addition to) the chicken production figures in Table "B". The boundaries of the Illinois River Watershed are uncertain and dependent on the entity defining the watershed. For example, as Plaintiffs' are aware, a poultry inspector from ODAFF has previously identified operations under contract with Peterson Farms as being

located in an adjacent watershed that Peterson Farms believed were in the Illinois River Watershed. Peterson Farms cannot possibly verify that the criteria and boundaries it used beginning in 2003 to designate a particular grower's watershed location are the same as those used, for instance, either by ODAFF for its regulatory purposes or by Plaintiffs in defining the Illinois River Watershed in their First Amended Complaint.

Furthermore, the chicken production figures in Table "B" do not take into account the size of the chicken in production during the respective periods, the age of the chickens at the time of death or removal from an operation, the length of time a given flock was in the particular operation, the mortality in the particular operation, the period in which a flock was in the care of a particular operation, the operations' respective cake-out or litter clean-out occurrences, the amount of litter removed from an operation, or the ultimate destination of poultry litter removed from any operation, which could be either within or outside the Illinois River Watershed. Similarly, the chicken production figures in Table "B" cannot reliably be used to estimate or calculate the number of chicken/head per day in a particular operation, the rate at which an operation experienced mortality among chickens initially placed in the operation, or the weight of the chicken at the time of death or removal from the operation.

In addition, in isolated incidences of which Peterson Farms is aware of only one, the figures reflected on Table "B" may be in error. The suspected error in the figures is contained in the "In 2004" and "Out 2004" column for Lee Breeder Farm on the hen portion (B-2) of Table "B". The "In 2004" figure of 27,395 is believed to be overstated by an amount equal to the "Out 2004" figure of 9,437; the transfer "out" represented by the 9,437

figure was an internal transfer specific to Lee Breeder Farm, resulting in double counting of these birds in the "in" figure. Upon information and belief, the accurate "In 2004" figure for Lee Breeder Farm should be the "In 2004" figure of 27,395 less the "Out 2004" figure of 9,437, or 17,958.

Therefore, subject to the foregoing objections, qualifications and caveats, the best estimate in Table "B" may be an over-estimate or under-estimate based on a number of factors of which a representative list only is discussed herein; these numerous factors, including but not limited to the aforementioned qualifications and caveats, constitute the "margin or error" for the bird production figures in Table "B".

Respectfully submitted,

By */s/ A. Scott McDaniel*
